Quick Reference List to UFA Chart of Account Codes

Color-Coded Guidance for a Minimum Chart of Accounts

1. **Blue** Indicates Level of Coding Required.
2. **Red** Indicates Business Rules in addition to the following.
3. “Tax funds” refers to Funds 10, 22, 23, 24, 28, 29, and 40 only.
4. If a header is the required level of coding, the district could choose to use the detail instead.
5. If detail is the required level of coding, the district could not choose to use the header instead.
6. Use of header or detail must be consistently applied for that grouping throughout the chart.
7. If a header or the detail is **Blue**, but the District does not have that activity/fund/program, that District would not need to enter that Unused header or detail code into its Chart of Account.
8. Generally districts/AEAs cannot add account codes except where noted. However see the next three business rules.
9. If a header is defined and there are blank rows under that header, the district or AEA may assign locally detail that is a subset of that header as long as there is not a more appropriate code already assigned for the activity.
10. If a header is not defined, the district or AEA may not assign locally either a header or detail.
11. If a district/AEA wants greater detail for a single assigned code, it would use a district defined dimension for the additional detail rather than splitting the assigned code into multiple rows.
